

# Basketball Bounce

## User Manual

### Goal

Welcome to Basketball Bounce! The name of the game is self explanatory - bounce the basketball! However, be sure to avoid hitting the obstacles. Your goal is to bounce the basketball as long as possible without touching any of the hoops or bouncing out of bounds. The bounds of the game are the top and bottom of the game box. You will immediately be sent back to the start menu if you go out of bounds or lose! You can either compete against yourself by trying to beat your previous high score, or compete against your friends by trying to beat their high scores. The possibilities are endless! So grab your basketball, and get ready to bounce it until you can't bounce anymore!

### Game Modes

There are two levels in Basketball Bounce: easy and hard. Easy mode consists of slower moving hoops which have wider gaps in between them. Hard mode has quicker hoops and smaller gaps, making it much more difficult to clear each gap.

### How to Play

Now you're probably wondering how to actually play Basketball Bounce. It's very simple! Use your mouse to select the game mode, and use the spacebar to bounce the basketball.

*Good luck, and have fun!*
